Delhi, India 

---

## SUMMARY

Full Stack Developer and Machine Learning enthusiast of experience in building scalable web applications and developing intelligent algorithms. Proficient in JavaScript, Python, React, and TensorFlow, with a strong focus on data-driven solutions. Committed to leveraging technology to enhance user experience and drive innovation

---

## PROFESSIONAL EXPERIENCE

### Machine Learning Intern

Jun 2023- Jul 2023

- Ibm edunet foundation | remote During a project-based learning internship at IBM, provided by Edunet Foundation, I explored machine learning concepts and algorithms to develop a mental health detection system that forecasts mental health trends for a country in the coming years.

### AI Intern

Feb 2025 - April 2025

- Kyutech, Japan | Worked on reservoir computing models like ECN to explore efficient neural network architectures for time series prediction and pattern recognition for a hand sign detection system. Developed and optimized model architecture to improve recognition accuracy and computational accuracy. Collaborated with Kyutech researchers to conduct experiments, analyze results, and document findings for AI applications.

---

## PROJECTS

### Candlestick prediction using CNN

- Collected data using the Yahoo Finance API and labeled it in various patterns. Built a model with TensorFlow Keras MobileNet, achieving 95% accuracy during evaluation.

### Sentiment analysis of Netflix Content

- Analyzed the contributions of top five directors and actors on Netflix, along with content production trends over the years and insights from the leading five countries. Conducted sentiment analysis to assess audience engagement and reactions to the platform's offerings.

### Movie App

- A React based movie app with a carousel TMDb API integration and categorised cards. Features seamless navigation with React Router and hover effects for detailed movie descriptions ensuring a user friendly experience.

### Statch a premium bag shop

- React based e-commerce website with a modern responsive design. Features dynamic product catalog, search and filter options, a shopping cart, detailed product pages user authentication and an admin dashboard for managing inventory and others.

---

## SKILLS

- |                        |                    |              |
|------------------------|--------------------|--------------|
| • Python               | • Machine learning | • Nodejs     |
| • Reservoir computing  | • Deep learning    | • Express JS |
| • Numpy Pandas Seaborn | • React            |              |

---

## EDUCATION

### Dronacharya College of Engineering - 2021-2025

- Bachelor of Technology - Computer Science and Engineering with Artificial Intelligence and machine learning.

### Holy Cross School

- High school - 2018-2020
